DETAILED ACTION

Response to Arguments

Applicant's arguments filed 06/29/2006 have been fully considered but they are not persuasive. Applicant states that the disclosure of Kim is directed toward the manufacturing of an LCD panel and is therefore non-analogous to the claimed process of forming a microswitch contact. Kim discloses how to create a microscopic contact with improved contact resistance. Although the disclosure is silent about using this contact in a microswitch, the art of creating a micro scale low resistance contact analogous to a microswitch contact in scale and operation.

Claim Rejections - 35 USC § 103

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2832

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kim [US 6,300,152] in view of Zavracky [US 5,638,946].

Claim 15, Kim discloses a process for preparing a contact [410, 320] on a microswitch [figure 6] comprising temporarily exposing the contact to an oxygen plasma to reduce contact resistance [col. 5 lines 44 to 49].

Kim fails to teach that contact formation includes Ru.

Zavracky discloses a microswitch [figure 2a] with a contact formation that includes Ru [col. 9 lines 23 to 27].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use Ru for the contact electrodes of Kim since it is a well known contact material as disclosed by Zavracky [col. 9 lines 23 to 27].

Allowable Subject Matter

Claims 12-14 and 20 are allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
